Preserved Wedding Flowers: When you have chosen how you would like your flowers preserved, please contact us to discuss which flowers you wish to preserve. As some preserve better than others, it may be that we recommend you choose certain flowers over others to represent your bouquet. Then simply send us your flowers and the process will begin immediately. A non-refundable deposit of £30 is required prior to your Wedding, so materials can be prepared to start the preservation process. When the product is complete we will contact you to collect the balance. Postage costs will be added at this stage, if applicable.

Posting your flowers: It is recommended that you post your flowers to us as soon as possible to ensure they are of the best quality - please email for our postage address. Please post by Royal Mail Special Delivery. We have found that the best way to post your flowers is to half-fill a plastic tub with kitchen roll or tissue paper. Place the flowers on the tissue and secure the box with tape prior to wrapping. Try to keep flowers as cool as possible prior to posting. Please do not hesitate to contact us with any further questions.

Payment methods

Cheque/Cash - Please contact us for our Bristol address.

BACS - Please email us for our business account details for fast, easy payment.

Card – Call 0117 973 8020 to make a card payment over the phone. Or pop in to Flowers by Alison in Clifton Village, Bristol.

Refunds: If you are at all unhappy with your product please contact us (within three days of receiving the item) and we hope to resolve the problem immediately. To save any concern, please read all about the preservation process carefully and thoroughly to ensure that you are fully aware of how your flowers may change or appear when encased in resin.

Please read the following information carefully, it details how your flowers may change during the preservation and encapsulation process.

- The preservation process can cause some discolouration or translucency and there can be a reduction in size due to loss of moisture.
- Some flowers last longer than others – if your flowers have lost their quality before they are preserved we are happy to replace with fresher flowers.
- Small air bubbles or fine lines may become trapped in the resin. These are tiny and hard to be avoided. Remember, this is a unique, handmade product which takes time and delicacy to achieve. The effects of resin can be unpredictable which is what makes your piece a one-off. Once encased, flowers cannot be removed.
- Do not place your flowers in direct sunlight as some discolouration may occur. If treated properly, preserved flowers can last longer than a lifetime. If you have purchased a vase, please ensure the water does not get too dirty when you are using it. This may cause slight discolouration to the surface of the resin. We recommend changing it every three days. This will ensure your fresh flower last longer too.
- As always, please take care not to leave lit candles unsupervised.
